

Caregivers of Individuals with Traumatic Brain Injury Needed

Recruitment for a Health Information Needs Study

Caregivers of individuals with a Traumatic Brain Injury (TBI) are invited to participate in a telephone interview about caregivers' health information needs. Participants must be over 18 and will be compensated \$20. The study is funded by the National Institute for Disability and Rehabilitation Research (NIDRR) and carried out by the Model Systems Knowledge Translation Center at the American Institutes for Research in collaboration with George Mason University. The goal of the study is to understand the caregiver's information needs to help improve the quality, clarity, and relevance of information available to individuals with traumatic brain injury, their families, and other stakeholders.
